"The Indian Academy of Cytologists (IAC) strongly condemns the inhuman and heinous crime resulting in the death of a bright young postgraduate doctor while on duty in RG Kar Medical College, Kolkata. We wish to convey our deepest sympathies and heartfelt condolences to the family and friends of the victim. We also strongly condemn the subsequent violent assault on the protesting doctors and the horror unleashed in the hospital.

We, the IAC stand in solidarity with the entire Indian medical community and alongside the Indian Medical Association (IMA) in taking a firm stand against any form of violence against medical professionals.

We demand and call on the authorities and administrations at both the Central and State governments for an unbiased, swift investigation to ensure that justice is served at the earliest possible. The perpetrators should receive exemplary punishment which will send a message that such acts will Never be tolerated and should never happen again.

We echo the demand of the much-needed requirement for safety of the medical professionals at the workplaces, especially hospitals. A safe working environment must be assured for one and all, especially women.

We also demand the implementation of a stringent law that will make our hospitals a safe and secure zone.

Let us rise in unity, uphold our dignity, and demand the respect that every doctor deserves. Together, we will make our voices heard and ensure that the sanctity of our profession is protected."
